Summary

Final-year B.Tech Information Technology student and MERN Stack Developer with hands-on experience in building full-stack web applications. Proficient in React, Node.js, Express, and MongoDB, with a strong focus on creating dynamic, interactive, and responsive user experiences. Passionate about delivering efficient, scalable solutions and contributing to innovative development teams.

Education

Bachelor Of Technology IT

College of Engineering Thalassery

Skills

Frontend Development: React.js, HTML5, CSS3, JavaScript, Redux, Bootstrap

Backend Development: Node.js, Express.js

Database: MongoDB, Firebase

Others: Python, Java, C, C++

Experience

MERN stack Intern

16-JUNE-2025 — 27-JUNE-2025

Luminar Technohub

Kochi

- Successfully completed a two-week internship program focused on the MERN Stack (MongoDB, Express.js, React, Node.js) development. The internship provided hands-on experience and foundational training in full-stack web development concepts and technologies. Demonstrated commitment, diligence, and a sincere work ethic throughout the program

Projects

Ai powered Expense tracker mobile app | *MERN*

- Developed a cross-platform mobile application that helps users track and manage their expenses with the power of AI. The app displays detailed daily, weekly, and monthly expense breakdowns and provides smart, AI-driven suggestions to optimize spending habits. Users can effortlessly add expenses through a clean and intuitive UI

Real-Time Weather Dashboard | *MERN , API*

- A responsive web application developed using html,css that delivers accurate, real-time weather data by integrating with a public weather API (e.g., OpenWeatherMap API).

E-commerce Platform | *HTML , CSS , JS*

- A static, front-end focused website designed to showcase fundamental web development skills in building a visually appealing and responsive e-commerce user interface. The project emphasizes clean code, modern design principles, and client-side interactivity.

Certifications

- **Uppcode Boot camp – Jan (2025):** Successfully completed the one-week Uppcode Bootcamp in software development. The program provided focused training in fundamental front-end technologies, including HTML, CSS, JavaScript, and Bootstrap. Demonstrated commendable skills and proficiency in these core web development technologies.
- **Innov8 Hackathon:** Participation in the INNOV8 Hackathon hosted by INNOVUS CS Association COET, on 8th April 2024
- **Generative AI :** Successfully completed the hands-on workshop, "AI for Students: Build Your Own Generative AI Model!" The workshop provided essential skills and practical experience in the field of Generative AI and modern artificial intelligence, preparing participants for the demands of the AI era.
